

One Acquisition Solution for Integrated Services (OASIS)

Your Total Solution Contract Vehicle for Complex Professional Services Requirements

OASIS and OASIS for Small Business (SB) were created based on the needs of the federal acquisition community. The result of a transparent and collaborative effort between GSA, industry partners, and customer agencies, the OASIS procurement contracts are flexible and efficient. OASIS and OASIS SB are your best-value solutions to address even the most complex professional services requirements, while saving the government time and money.

Streamline Your Procurement of Complex Professional Services

The GSA Multiple Award Schedules (MAS) program is the most comprehensive acquisition vehicle available to federal procurement professionals like you, offering complete, state-of-the-industry services and products. At GSA, we're constantly adapting the acquisition solutions we offer to accommodate the needs of stakeholders like you. Working with a vast spectrum of federal procurement professionals every day allows us to see trends quickly, and make sure our portfolio of offerings address them.

This working partnership led to the discovery that professional service-related acquisitions required not only the professional service as part of the procurement, but ancillary services and products as well. In many cases, multiple procurements were needed to provide a total solution to these kinds of requirements, which led to costly duplication of effort. OASIS and OASIS SB compliment the MAS program by providing a way for you to procure very complex requirements through a single acquisition.

Examples of complex professional services requirements include requirements that:

- Contain multiple disciplines;
- Contain significant IT components, but are not IT requirements;
- Contain other direct costs; or
- Need to be performed on a cost reimbursement basis

Get to Know OASIS

In order for you to take full advantage of the OASIS contracts, you must take training and receive a Delegation of Procurement Authority (DPA) from GSA. GSA is offering you a great opportunity for in-person or online training.

Visit www.gsa.gov/oasis and request your training today.

OASIS Offerings

The OASIS menu of services addresses your every professional services need including program management, logistics, management consulting, engineering services, scientific services, and financial services. Ancillary support components such as Information Technology, and administrative support are also covered when integral and necessary to your overall requirement. You can use OASIS for all contract types at the task order level including fixed price, cost reimbursement, time and materials, labor-hour, and hybrid combinations of contract types on a single order. OASIS is not a Governmentwide Acquisition Contract (GWAC). GWACs are specific to IT requirements while OASIS contracts are specific to Professional Services requirements.

OASIS and OASIS SB

The OASIS program represents a family of contract vehicles designed to allow maximum flexibility in meeting client needs while simultaneously maximizing Small Business utilization. The OASIS family of contracts includes a set of unrestricted contracts with a very high small business subcontracting goal, and a set of 100% Small Business Set-Aside contracts. If circumstances warrant, OASIS SB will even allow for set-asides based upon special socioeconomic status.

OASIS Program Benefits

- Offers a single government-wide acquisition platform to support complex professional services requirements and both Commercial and Non-Commercial Professional Services;
- Maximizes opportunities for Small Businesses;
- Offers a limited number of awardees and contract holders;
- Offers on-ramp/off-ramp procedures to ensure a flexible, vibrant vendor pool;
- Supports customers with a robust web library that, among other support features, will have sample documents, templates, and a platform for sharing of best practices;
- Enables agencies to concentrate on agency missions rather than the acquisition itself, minimizing the proliferation of full and open contracts;
- Reduces the lead time and administrative efforts it currently takes agencies to acquire complex professional services;
- Allows for all contract types at the task-order level, including cost-reimbursement;
- Allows for the full flexibility to add ancillary support (other direct costs) at the task order level;
- Allows labor categories to be added at the task order level;
- Standardizes labor categories and qualifications levels

OASIS and OASIS SB are two reliable, flexible and efficient ways for you to obtain best-value solutions for complex professional services. It breaks the barriers in the world of acquisition by providing you with a total professional services solution across the enterprise.
