

8D Problem Solving

Course Fee: \$350 (lunch included)
Southwest Research Institute
6220 Culebra Road, San Antonio, TX 78238

Many things can go wrong in a manufacturing facility. Common problems are errors in specifications, over/underruns, missed shipping deadlines, and much more. But what is the root cause of the problem? And what can be done to solve it?

Our 8D Problem Solving course includes lectures, classroom discussions, and hands-on exercises covering the eight disciplines (8D) of problem solving and the necessary tools to implement long-term solutions. This course helps participants follow a time-proven, structured approach to identify the cause of a problem, solve it, and prevent it from occurring again. This saves your organization time, money, and resources.
