# The 6th International Supercritical CO<sub>2</sub> Power Cycles Symposium

## March 27 – 29, 2018

### Sheraton Pittsburgh Hotel at Station Square

The Supercritical CO<sub>2</sub> Power Cycles Symposium was organized to advance Supercritical Carbon Dioxide (sCO<sub>2</sub>) power cycle technology. Researchers, industry partners, and end users meet to learn about advancements in the field, discuss priorities, and establish a critical path for technology development.

The objectives of the meeting are to share the status of world developments, discuss feedback on development status and direction from participants, and obtain an integrated view of development priorities. The perspective gained will allow researchers to better coordinate work and allow the participants greater insight into the overall direction of this technology.

Keynote presentations will address big picture development priorities and critical path issues. There will be networking opportunities.

The foremost conference for sCO<sub>2</sub> Power Cycles features:

- Keynote presentations by industry and government leaders will address big picture development priorities and critical path issues.
- Technical papers and tutorials by experts
- Industry and government R&D panel sessions
- Networking reception, lunches and dinner
