

FUELS & LUBRICANTS

SwRI Services by the Numbers

502,000
hours of component testing

160,000
ft² of laboratory space

1.84
million gallons of onsite fuel storage

390
full-time employees

5,000
unique stationary test rig evaluations

100+
engine test cells

100,000
unique samples analyzed per year

500,000+
chemical analysis tests conducted per year

24/7/365
operations

Since 1949, SwRI has dedicated extensive resources to evaluating fuels and lubricants against a full range of standards for light-, medium- and heavy-duty vehicles as well as off-road, marine and locomotive applications.

We are one of the largest independent fuels and lubricants laboratories in the world, testing virtually every engine oil and vehicle fluid available on the market. We conduct pioneering research, development and testing with these facilities and activities in any given year.*
